### 2 Application of new and revised International Financial Reporting Standards (IFRS)

Amendment to standards and interpretations issued and effective during the financial year beginning 1 January 2021 with no material effect on the financial statements

Interest Rate Benchmark Reform – Phase 2: Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16

The amendments provide temporary reliefs which address the financial reporting effects when an interbank offered rate (IBOR) is replaced with an alternative nearly risk-free interest rate (RFR). The amendments include the following practical expedients:

- A practical expedient to require contractual changes, or changes to cash flows that are directly required by the reform, to be treated as changes to a floating interest rate, equivalent to a movement in a market rate of interest.
- Permit changes required by IBOR reform to be made to hedge designations and hedge documentation without the hedging relationship being discontinued.
- Provide temporary relief to entities from having to meet the separately identifiable requirement when an RFR instrument is designated as a hedge of a risk component.

#### Amendment to standards and interpretations issued but not yet effective

• Amendments to IFRS 16: COVID-19-Related Rent Concessions beyond 30 June 2021

In March 2021, the IASB amended IFRS 16 Leases, extending the practical expedient in order to permit lessees to apply it to rent concessions for which reductions in lease payments affect payments originally due on or before 30 June 2022. This amendment is applicable for annual reporting periods beginning on or after 1 April 2021, with early application permitted, including in financial statements not authorised for issue at 31 March 2021.

The above amendments are not expected to have any material impact on the interim condensed consolidated financial statements of the Group. The Group intends to use the practical expedients in future periods if they become applicable.

The significant judgments made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were consistent, except as detailed below.

In March 2020, the World Health Organization (WHO) declared a new strain of coronavirus (COVID-19) as a pandemic outbreak after finding the increase in exposure and infections across the world. To contain the outbreak in the United Arab Emirates, the government enforced restriction of movement for both people and goods including the closure of both inbound and outbound flights to and from the country.

Notes to the unaudited interim condensed consolidated financial information for the six-month period ended 30 June 2021 (continued)

### 3 Summary of significant accounting policies (continued)

#### Changes in judgements and estimation uncertainty (continued)

The outbreak comes with unpredictable human and economic consequences and its evolution remains unknown at the date of the issuance of the financial statements. As the situation is rapidly evolving, the impact on the Group's activities and operations remains uncertain.

The Group regularly assesses the impact of COVID-19 on its operations, business continuity, liquidity and legal obligations. In the current period assessment, the Group expects, notwithstanding another outbreak of the pandemic, a continued recovery in consumption in the retail and non-retail fuel sector due to the easing of some of the restrictions that had been in place at the beginning of the pandemic.

The Group will continue to closely monitor the impact of COVID 19 and a prolonged continuation of the situation and/or another outbreak may lead to further provisions and/or impairment in future periods.

The Group has a documented business continuity plan (BCP) that has been activated to ensure the safe and stable continuation of its business operations as well as the safety of its employees and customers. The Group has also introduced proactive comprehensive measures to address and mitigate key operational and financial issues arising from the current situation and has reasonably managed several areas of operational risks identified and implemented various measures that ensured continuity of the operations.

On 16 October 2017, ADNOC Distribution signed a mandate letter (the "Mandate Letter") with a consortium of banks where the consortium agreed to underwrite a 5 year, USD 2,250,000 thousand (AED 8,263,130 thousand) unsecured credit facility (the "Facility"). The Facility is bifurcated further into a term facility commitment of USD 1,500,000 thousand (AED 5,508,750 thousand) and a revolving facility commitment of USD 750,000 thousand (AED 2,754,380 thousand). The purpose of the facility is for general corporate and working capital purposes including payment of dividend, repayment of debt and payment of transaction costs associated with the facility. There are no financial covenants included in the facility documents.

The transaction costs allocated to the revolving facility have been capitalised and will be amortised on effective interest rate basis over the term of the agreement. Unamortised transaction costs amounting to AED 3,869 thousand as at 30 June 2021 (31 December 2020: AED 5,213 thousand) are presented as other non-current asset in the unaudited interim condensed consolidated financial information.

On 16 November 2017, the Group made a drawdown amounting to USD 375,000 thousand and AED 4,128,750 thousand. The Facility carries variable interest at USD LIBOR plus a margin of 0.875% for USD denominated facility portion and EIBOR plus a margin of 0.60% for AED denominated facility portion. The term facility is to be repaid at final maturity which is 5 years from the date of the facility agreement.

#### Update on prospective changes in reference rates (IBOR)

The impact of the replacement of interbank offered rates ('IBORs') with alternative risk-free rates on the Group's investments and liabilities remains a key area of focus. The Group's exposure to contracts referencing IBORs, such as LIBOR and EIBOR, extending past 2021 is not considered material when it is likely that these IBORs will cease being published. The management will continue to benchmark long-term debt contracts referencing EIBOR, however, management plans to introduce a new index for the AED contracts as per the new Dirham Monetary Framework in later part of the year 2021. For the LIBOR denominated contracts, the relevant reference rate will be SOFR Secured Overnight Financing Rate and management is consistently monitoring the related changes and the impact it might have on the Group's operations. The transition to the new Dirham Monetary Framework and SOFR is significant in terms of scale and complexity, however, the process of adopting new reference rates does not expose the Group to any operational and financial risks resulting from contract modifications. The Group will continue to engage with various stakeholders to support an orderly transition and to mitigate the risks resulting from the transition.

IFRS 8 requires operating segments to be identified on the basis of internal reports about components of the Group that are regularly reviewed by the Board of Directors, as the chief operating decision maker (CODM), in order to allocate resources to the segment and to assess its performance. Effective from 2020, the CODM has approved the use of the new segment reporting structure. The new structure aligns the segmentation of the management's categorisation of the Group's customers into Commercial (B2B) and Retail (B2C) categories.
